

SERVICES LANDING PAGE CONTENT

[Intro]

Exactly IT is a next generation managed services provider. From cloud services and cyber security to end-user support and technology solutions, we offer a wide range of managed IT capabilities. Emphasizing focus and flexibility, ExactlyIT takes a scaled, right-sized approach, tailoring our service packages to fit your business needs.

We provide *exactly* what you want, *exactly* when you need it.

IT Transformation

Agile, partner-focused, and geared for innovation, Exactly IT offers both tested solutions and new ideas for streamlining and transforming your company's IT. Managing and advancing your information processing and juggling various IT vendors is no longer your concern. We'll *own* that. Using DevOps practices and insider access to the newest tools in automation, Exactly IT stays up-to-speed in the tech world, so you don't have to.

Earn Your Business Everyday

Anchored in empathy, integrity, and good governance, we adhere to common sense business practices and customer service standards that other firms left behind years ago. Offering honest, reliable services and flexible contracts, our dynamic and experienced leadership team believes that transparency and accessibility are vital in partnerships and necessary for success. We deliver daily to keep your business moving forward and ahead of the curve.

Azure Cloud Services

We implement the tools and best practices essential for a smooth-running Azure platform. Managing your consolidated storage, networking, security, and virtual computing minimizes risk and equals a more optimized and effective business environment.

Google Cloud Services

ExactlyIT administers and manages your SAP applications on the Google Cloud Platform. Using advanced automation and DevOps methods we handle all your cloud computing needs – so that you can stay focused on winning at business.

Remote Managed Infrastructure

Experienced in critical infrastructure management, we monitor and optimize your IT framework, offering ease of maintenance and coordination for all your IT requirements. Centralized, highly automated management saves costs, reduces errors, and increases productivity.

Aryaka SD-WAN Solutions

Our team utilizes Aryaka's impressive application performance and built-in wide area network optimization to meet your specific network needs. Enjoy streamlined network management with end-to-end global services for the cloud-first era thanks to over 30 PoPs around the globe.

Cybersecurity Services

Exactly IT's Security Operations Centers run around the clock to leverage our comprehensive threat intelligence and machine learning capabilities to protect against tricky cyber-attacks.

End User Client Services

Whether it's help desk needs or deployment assistance, we streamline and enhance the end user experience. Our white glove approach provides friendly technical expertise to eliminate business disruptions. Proactive and agile, ExactlyIT helps your end-users stay compliant, current, and in high gear.

Application Management Services (AMS) – SAP

Providing business process support, our SAP experts maintain and enhance your SAP enterprise applications. Tailored services from experienced consultants result in maximum value to your business.

Microsoft Solutions

ExactlyIT is a Microsoft Gold Partner well-versed in Microsoft solutions. From Azure Cloud to Windows Virtual Desktop to Microsoft Endpoint Manager, we have the experience and knowledge to deliver a modern workplace solution for your company.

Mergers & Acquisitions

Know the costs and realities of what it takes to successfully fuse technology and operations. In pressure-cooker situations where time is money, we offer efficient, client-specific strategies for speedy IT integration and a successful acquisition.
